

Accent Vocabulary Programs

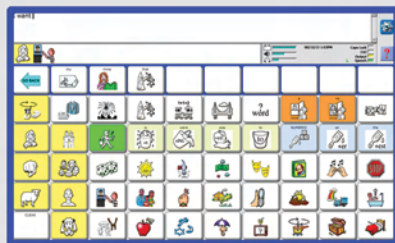

CHOOSING THE RIGHT PROGRAM IS

THE KEY TO COMMUNICATION SUCCESS

UNITY®

Unity is a unique and effective solution for representing language in an AAC device. Unity uses a small set of pictures which when combined in short sequences, words and sentences can be quickly produced.

Unity supports vocabulary development from basic functional communication to talking in complete sentences. It provides the tools for learning language, building vocabulary and developing literacy for individuals who are pre-literate to those with strong literacy skills. Features like 'Icon Tutor' (to quickly help you find words) and 'Vocabulary Builder' (to quickly set the system with just the words you want to teach) make supporting and using the system easy. Unity is available in the following grid sizes; 28, 36, 45, 60, 84 and 144.

CORESCANNER™

CoreScanner is a progressive vocabulary program specifically designed for individuals with physical disabilities, who best access augmentative communication technology through the use of a switch.

The CoreScanner design is based upon the foundations of Unity®, and LAMP which have proven effective for so many people, and on the following principles: Motor Planning, Single Words, Core Vocabulary and Frequency of Use, Robust Vocabulary Needs and Early Access.

LAMP - WORDS FOR LIFE™

LAMP - Words for Life™ is a vocabulary that combines the power of Unity® and LAMP. LAMP is a therapeutic approach based on neurological and motor learning principles as well as clinical experiences that address the language development and communication needs of those with autism.

It provides a consistent motor pattern for words and a systematic way to develop communication skills allowing for unlimited language growth opportunities.

Accent Vocabulary Programs

CHOOSING THE RIGHT PROGRAM IS

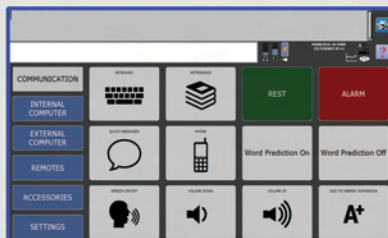

THE KEY TO COMMUNICATION SUCCESS

WORDPOWER™ AND PICTURE WORDPOWER™

WordPower is available as a text or pictorial based program. Both programs combine core vocabulary, spelling and topic-based pages in a variety of grid sizes: 45, 60, 84 and 144 keys.

WordPower and Picture WordPower are supplemented by an extensive range of pages that are fully customisable. Both programs feature a QWERTY keyboard and word prediction. Picture WordPower is available with either PCS or MinSymbols.

ESSENCE™

Essence is a text-based program that allows individuals the ability to communicate using a selection of familiar keyboards, pre-stored phrases and word prediction.

Essence combines language access with infrared environmental controls, word processing, email, internet access, MP3 player and scheduling reminders.

When deteriorating motor abilities make typing difficult, Essence can be accessed using switches, head-pointing, joystick or eye-gaze.

WORDCORE™

WordCore is a text-based program that offers the user the ability to access core vocabulary combined with spelling and word prediction. For those with developed literacy skills WordCore provides quick and easy access to language expression.

WordCore can be used in a variety of grid sizes (45, 60, 84 and 144 keys) and is easy to use and support.
