Core – Again, bad, big, close, different, do, don't, down, feel, get, go, good, happy, I, it, like, look, make, me, mine, more, my, off, out, play, ready, slow, stop, take, that, turn, up, want, what, you

Fringe – song, clothes, score, countries

What to do

Choose a fun thing to look out for while watching the Eurovision Song Contest for each person playing. Keep score of how many times it appears during the contest – biggest number wins!

Examples could include:

- The presenter changes their outfit
- Someone mentions Abba
- Someone has flag face paint
- The UK gets one point
- There is a glitter cannon

Here are some modelling ideas to support this activity:

- You can model key core words on an AAC device to comment on what's happening
- You can pre-programme some fringe vocabulary or phrases onto an AAC device and model how to use these
- You might want to have fun with some of the features on your AAC device such as programming sound effects, audio, videos or using visual scenes.

As always, **don't place any pressure on an AAC user to use their device** and make sure to accept **any** way someone chooses to communicate.

If you need any support to program any of the above ideas onto your AAC device, please contact your local consultant!

Sentence Ideas

1WL - *good, like, look, me, mine, off, more*

2WL - *turn up, want again, mine look*

3WL - *turn it off, look that good*

Language Functions
